To Whom it may concern;

I have obtained a substantial amount of software knowledge and experience pertaining to my professional life that combines experiences from various creative fields to initiate a comprehensive work environment to ensure quality in collective productivity. As much as I'm a great team player, I'm also the right employee with the right skill set to enhance the progress of the company where I can be a great asset with irreplaceable influence in the culture of your company. I'm very quick learner with great instincts and insights which makes me exceptional candidate to adopt and lead in any work environment almost seamlessly regardless of the complexity or the stress levels. I'm a hard worker who willing to put in additional work hours as needed and i also find joy in frequently learning new instruments to progress myself in consistently developing internet hyperspace so that i could utilize new tools, softwares & ideas as they come along which gives me advantage to see projects in a different light.

i come from & live with the family of artists which made making art very competitive & fun in many inventive ways that influenced my creative work for many years where i can bounce ideas and get adequate results like a collective mind in progress which contributed to a great extent to establish my creative background that made me who i'm today that can offer your company trend setting vision to spot next eye catching content.

Please review my attached resume regarding my expertise.
Sincerely,
Kanan Alibayov
